

## Joint Authorities for Rulemaking on Unmanned Systems

**PRESS RELEASE No. 2017/17**

**16 January 2017**

### **JARUS Publications: CS-LUAS is now available online**

JARUS is pleased to announce to the RPAS Community that the deliverable “**JARUS CS-LUAS - Recommendations for Certification Specification for Light Unmanned Aeroplane Systems**” is now available on the JARUS Website at <http://jarus-rpas.org/publications>

The JARUS-CS-LUAS aims at providing recommendations for States to use for their own national legislation, concerning Certification Specification for Light Unmanned Aircraft Systems. These recommendations represent the culmination of best practices and procedures used in RPAS approvals to date.

This is another significant accomplishment by JARUS, with the contributions of our member countries and the experts of Working Group 3 (Airworthiness).

Feel free to forward this message to anyone interested about JARUS deliverables.

#### **Note to editors**

JARUS is a group of experts from 49 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
