

Joint Authorities for Rulemaking of Unmanned Systems

PRESS RELEASE No. 2014/01

June 30, 2014

External consultation for 1st edition JARUS – ORG

Please be informed that the proposed 1st edition of JARUS-ORG (v 0.17) is now available on the JARUS website under "Draft Deliverables" for external consultation <http://goo.gl/OSFtwc>, together with the comments' form which is not online though this procedure will change in the near future to make it easier. Therefore, please send your comments back to julia.sanchez@eurocontrol.int in order to gather all your views.

This 1st edition contains proposed requirements for RPAS Operators (commercial and non-commercial) and Approved Training Organizations. Subsequent editions would include requirements for design, production, maintenance and other organisations.

Since this document has already been presented at the public Workshop in May 2014, we are starting the external consultation immediately. The deadline for providing comments is **August 29, 2014**.

JARUS is soliciting feedback and comments from authorities and stakeholders in the non-military RPAS market from anywhere in the world.

JARUS is a group of experts coming from National Aviation Authorities (NAAs) from the five continents and the European Aviation Safety Agency (EASA).

Filippo Tomasello, rapporteur of the JARUS Group on the matter, declared: *"This first edition of JARUS-ORG may not be perfect; but we firmly believe that to further widen the market, we need clear rules on all professional operators of civil drones, commercial and non-commercial"*.

More information about JARUS can be found on the website
