

Joint Authorities for Rulemaking on Unmanned Systems

PRESS RELEASE No. 2017/19

11 April 2017

JARUS Publication: Guidance Material to JARUS-FCL Recommendation now available online

JARUS is pleased to announce to the RPAS Community that the deliverable
“Guidance Material to JARUS-FCL Recommendation”
is now available on the JARUS Website at <http://jarus-rpas.org/publications>

In October 2015 the first edition of the JARUS-FCL Recommendation was published. This GM provides a harmonised basis to regulate organisations involved in the civil RPAS life cycle.

The JARUS-FCL Recommendation and its GM may be used by the competent authorities to develop provisions regarding licensing and competencies in RPAS activities, in relation to the concept of operations in their respective States or Regions.

This is another significant accomplishment by JARUS, with the contributions of our member countries and the Working Group 1 experts (Flight Crew Licensing).

Feel free to forward this message to anyone interested about JARUS deliverables.

Note to editors

JARUS is a group of experts from 50 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
