

Joint Authorities for Rulemaking on Unmanned Systems

PRESS RELEASE No. 2018/28

November 09th, 2018

JARUS External Consultation for "JARUS SORA Annex G - Air Risk Collision Model" is now open!

Submit your comments online.

JARUS is pleased to announce the launch of the External Consultation for the "**Annex G - Air Risk Collision Model**" of the JARUS guidelines on Specific Operations Risk Assessment (SORA).

Annex G is explanatory to the elements of the Air Risk Collision model in SORA 2.0. This Annex also provides rationale and justifications to the air risk collision model elements. The Annex G information is not part of the SORA process but provides clarifications and substantiations to the elements in the air risk collision model.

We invite all JARUS stakeholders to provide comments on the new proposed Annex G of the SORA.

JARUS Working Group 4 (Detect and Avoid) has developed the "**SORA Annex G**" in close cooperation with the JARUS WG 6 (Safety & Risk Management) with the contribution of experts from several JARUS Member States.

The External Consultation will be open until **Friday 07 December 2018** at https://ost.eurocontrol.int/sites/rpas/ext_consultations/SitePages/Home.aspx

Please note you must register on "**One Sky Team**" to access the documents and submit your comments.

Already registered for the ongoing JARUS External Consultation?

Go directly to https://ost.eurocontrol.int/sites/rpas/ext_consultations/SitePages/Home.aspx

Not registered?

1. Self-register [here](#).
2. Then send an email to the JARUS Secretariat at contact@jarus-rpas.org.
A member of the Secretariat will reply once you have been granted access.

PLEASE NOTE: Only comments submitted online by Friday 07 December will be considered.

Note to editors

JARUS is a group of experts from 56 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
