

**Joint Authorities for Rulemaking on Unmanned Systems**

**PRESS RELEASE No. 2019/29**

February 19<sup>th</sup>, 2019

**JARUS External Consultation for "*CS-UAS Recommendations for Certification Specification for Unmanned Aircraft Systems*"  
is now open!**

**Submit your comments online.**

JARUS is pleased to announce the launch of the External Consultation for the "**CS-UAS Recommendations for Certification Specification for Unmanned Aircraft Systems**".

CS-UAS was developed to recommend a single set of technical, safety and operational requirements for all aspects linked to the safe operation of Unmanned Aircraft Systems.

CS-UAS is based on objective requirements, which are design-independent and applicable to the entire range of CS-UAS applicability. These objective requirements will be used as a basis to develop Airworthiness Design Standards (ADS), where the design-specific details will be captured.

In addition, CS-UAS contains Guidance Material (GM), which should be used as a guidance to develop one or more Airworthiness Design Standards (ADS) to comply with CS-UAS.

The objective requirements shall be in compliance with ICAO Annex 8 developed to include unmanned aircraft systems. The Annexes B, C, etc. of CS-UAS are reserved for objective requirements for operational- and technical configuration and technologies not foreseen in ICAO Annex 8 at the time of issue of this CS-UAS. They will be developed after the first issue of CS-UAS.

We invite all JARUS stakeholders to provide comments on the new proposed CS-UAS.

JARUS Working Group 3 (Airworthiness) has developed the "**CS-UAS**" with the contribution of experts from several JARUS Member States.

The External Consultation will be open until **Wednesday 20 March 2019** at [https://ost.eurocontrol.int/sites/rpas/ext\\_consultations/SitePages/Home.aspx](https://ost.eurocontrol.int/sites/rpas/ext_consultations/SitePages/Home.aspx)

Please note you must register on "**One Sky Team**" to access the documents and submit your comments.

## Already registered for the ongoing JARUS External Consultation?

Go directly to [https://ost.eurocontrol.int/sites/rpas/ext\\_consultations/SitePages/Home.aspx](https://ost.eurocontrol.int/sites/rpas/ext_consultations/SitePages/Home.aspx)

## Not registered?

1. Self-register [here](#).
2. Then send an email to the JARUS Secretariat at [contact@jarus-rpas.org](mailto:contact@jarus-rpas.org).  
A member of the Secretariat will reply once you have been granted access.

**PLEASE NOTE: Only comments submitted online by Wednesday 20th March will be considered.**

---

## Note to editors

JARUS is a group of experts from 59 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
