

Joint Authorities for Rulemaking on Unmanned Systems

PRESS RELEASE No. 2019/32

April 29, 2019

**JARUS External Consultation for
"JARUS recommendation UAS RPC CAT A and CAT B" is now open!**

Submit your comments online.

JARUS is pleased to announce the launch of the External Consultation for the
**"JARUS Recommendation for Remote Pilot Competency (RPC)
for UAS operations in Category A (OPEN) and Category B (SPECIFIC)".**

The purpose of this deliverable is to define a framework that can be used by any competent national aviation authority (NAA) for UAS remote pilot competence (RPC) operating in either Category A (alias 'OPEN') or Category B (alias 'SPECIFIC').

The recommendations in this document represents the culmination of best practices and procedures used in prior UAS approvals, existing regulations, as well as input from JARUS Working Group 1 (Flight Crew Licensing) expert members.

For theoretical knowledge training a core list of basic theoretical knowledge subjects is developed, which any remote pilot operating in any class of airspace should possess.

This basic core is described in Part A for Category A which outlines specific areas of theoretical knowledge which should be assessed by examination.

In Part B for Category B an enhanced core set of theoretical knowledge (on top of the basic theoretical knowledge of Category A) is developed with additional mission-specific competencies that would act as endorsements on a certificate of competence issued by a competent authority, recognized entity, or otherwise documented by an UAS operator.

We invite all JARUS stakeholders to provide comments on the new proposed JARUS deliverable.

JARUS Working Group 1 has developed the new JARUS recommendation with the contribution of experts from several JARUS Member States. Please note you must register on **"One Sky Team"** to access the documents and submit your comments.

Already registered for the ongoing JARUS External Consultation?

Go directly to https://ost.eurocontrol.int/sites/rpas/ext_consultations/SitePages/Home.aspx

Not registered?

1. Self-register [here](#).
2. Then send an email to the JARUS Secretariat at contact@jarus-rpas.org.
A member of the Secretariat will reply once you have been granted access.

PLEASE NOTE: Only comments submitted online by 30 June 2019 will be considered.

Note to editors

JARUS is a group of experts from 59 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
