

## Joint Authorities for Rulemaking on Unmanned Systems

### PRESS RELEASE No. 2019/34

May 7<sup>th</sup>, 2019

#### **JARUS SORA Standard Scenario “STS-01” for Aerial Work Operations (STS-01) now available!**

JARUS is pleased to announce to the RPAS Community the publication of the first **SORA Standard Scenario for Aerial Work Operations (STS-01)** on the JARUS Website at <http://jarus-rpas.org/publications>

This Standard Scenario (STS) is intended to cover UAS operations performed in the Specific category (category B) with the following main attributes:

- over sparsely populated areas
- in uncontrolled airspace
- at very low levels
- BVLOS with visual air risk mitigation
- using unmanned aircraft up to 3M dimension (wingspan or rotor diameter)

The Standard Scenario STS-01 is based on real life experience. It is meant to facilitate any operation within its scope.

JARUS **Working Group 6** (*Safety and Risk Management*) has consolidated this new JARUS deliverable taking into account the JARUS Internal and External consultation process with contributions from experts from all over the world.

STS-01 is additional deliverable complementing the [SORA package 2.0](#), which can be downloaded at <http://jarus-rpas.org/publications>.

Stay tuned as an additional Standard Scenario will be soon open for External Consultation.

Feel free to forward this message to anyone interested in this new JARUS deliverables.

---

#### **Note to editors**

JARUS is a group of experts from 59 National Aviation Authorities (NAAs) and regional aviation safety organizations, as well as EASA and EUROCONTROL.

JARUS aims to recommend a single set of technical, safety and operational requirements for the certification and the safe integration of Unmanned Aircraft Systems (UAS) in airspace and at aerodrome. Seven Working Groups provide guidance material and recommendations to facilitate national aviation authorities to develop their own requirements and avoid unnecessary duplication of effort.
